24/7 emergency roof services

💧

Emergency Leak Tarping

Heavy-duty tarps installed within hours to stop water intrusion. Prevents ceiling collapse, mold, and structural damage.

🌲

Fallen Tree Removal

Tree branches or entire trees on roof — we safely remove debris, tarp damage, and prep for permanent repair.

🌀

Storm Damage Repair

Wind, hail, hurricane damage. We document everything for your insurance claim and make temporary repairs.

🔧

Missing Shingle Replacement

Emergency replacement of missing or blown-off shingles to prevent leaks until full repair.

💨

Vent & Flashing Repair

Broken vents, torn flashing, or damaged chimney seals — quick fixes to stop active leaks.

📋

Insurance Claim Assistance

We meet adjusters, document damage, and ensure your claim is processed quickly. Temporary repairs covered.

Every hour counts — don't wait

Water damage spreads faster than you think. Immediate action saves thousands.

💧 **First 1-6 hours**

Water absorbs into insulation, drywall, wood. Stains appear. Minimal damage.

⚠️ **6-24 hours**

Water wicks up walls. Mold begins forming. Materials start swelling.

🔥 **24-48 hours**

Significant structural damage. Mold colonies visible. Health risks increase.

💰 **72+ hours**

Drywall replacement needed. Possible framing damage. Costs multiply 5-10x.

What to do while waiting for emergency roofers

🪣 **Place buckets under leaks**

Catch dripping water to protect floors and furniture.

📸 **Take photos & videos**

Document damage for insurance claim before any repairs.

🔌 **Move electronics away**

Clear area under leak. Unplug devices if safe.

📋 **Call insurance**

Many policies require prompt reporting. We help with paperwork.

🚫 **Don't climb on roof**

Wet roofs are extremely dangerous. Leave to professionals.

🧽 **Poke small hole in ceiling**

If ceiling is sagging (water pooled), carefully poke hole to release water into bucket.
